

Scalability & Future Plan

Date	3 JULY 2026
Team ID	XXXXXX
Project Name	AI-Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited support for real-time financial data integration	Users must manually enter financial information, reducing automation.	High
2	Basic AI recommendations without personalized learning	Recovery plans may not fully adapt to changing financial behavior.	Medium
3	Limited scalability for a large number of concurrent users	Performance may decrease as the number of users increases.	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users	Deploy on cloud infrastructure with auto-scaling and load balancing
2	Data Storage	Stores data locally or in a basic database	Migrate to cloud databases (Firebase, PostgreSQL, or MongoDB)
3	Performance	AI processing may slow during peak usage	Optimize AI models, implement caching, and use asynchronous processing
4	Security	Basic authentication and encryption	Implement Multi-Factor Authentication (MFA), stronger encryption, and regular security audits

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Add real-time bank account and financial API integration	3 Months	Improve automation and reduce manual data entry
Phase 2	Introduce AI-powered budgeting and spending prediction	6 Months	Enhance financial planning and personalized recommendations
Phase 3	Launch Android and iOS mobile applications	9 Months	Increase accessibility and user engagement
Phase 4	Integrate multilingual support and voice-based financial assistant	12 Months	Expand accessibility and improve user experience for diverse users
