

Solution Requirements

Date	27 JUNE 2026
Team ID	XXXXXX
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Users can securely register, log in, reset passwords, and access the platform using encrypted authentication.	High
2	Authorization Levels	Role-based access control for Users and Administrators to ensure secure access to system features.	High
3	External Interfaces	Integration with AI services, Credit Bureau APIs, Banking APIs, email notifications, and SQLite database.	High

4	Transaction Processing	Process loan details, financial analysis, debt settlement predictions, EMI tracking, and user updates securely.	High
5	Reporting	Generate financial health reports, loan summaries, settlement recommendations, payment history, and dashboard analytics.	Medium
6	Business Rules	AI analyzes user financial data and recommends personalized debt recovery strategies based on eligibility and financial condition.	High
7	Compliance to Laws & Regulations	Protect user financial data by following data privacy standards and secure data handling practices.	High
8	Other	AI-based negotiation support, alerts, reminders, and personalized financial recommendations.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	Financial analysis and dashboard should load quickly.	Response time < 3 seconds

2	Scalability	Support increasing numbers of users and financial records without performance degradation.	Supports 10,000+ users
3	Security & Data Privacy	Encrypt user financial data, secure authentication, and prevent unauthorized access.	AES-256 Encryption, Secure Login
4	Reliability & Availability	Platform should remain available with minimal downtime.	99.9% System Uptime
5	Usability & Accessibility	User-friendly interface with simple navigation across desktop and mobile devices.	Responsive UI and easy accessibility
6	Other	Easy maintenance, backup & recovery, portability, and future integration with additional banking and AI services.	Maintainable, Portable & Extensible
