Project Title	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposed solution is an AI Powered Debt Relief Financial Recovery Platform that helps users manage loans, analyze their financial health, and receive AI-powered debt settlement recommendations. The platform improves financial decision-making by providing personalized repayment strategies, loan tracking, and AI-assisted negotiation support. It enhances financial planning, reduces repayment risks, and improves overall financial well-being.

Project Overview	
Objective	The primary objective is to develop an AI-powered platform that enables users to manage debts efficiently, assess financial health, predict suitable debt settlement strategies, and improve financial recovery using intelligent recommendations.
Scope	The project provides secure user authentication, loan management, financial health analysis, AI-based settlement prediction, repayment tracking, and personalized financial recommendations through a simple web interface.
Problem Statement	
Description	Many individuals struggle to manage multiple loans, understand their financial condition, and choose effective repayment strategies. Existing solutions often lack intelligent recommendations and personalized financial guidance.
Impact	The platform helps users reduce financial stress, improve repayment planning, avoid loan defaults, and make informed financial decisions using AI-powered insights.
Proposed Solution	
Approach	The system uses FastAPI, Streamlit, SQLite, and AI-based analysis to securely process financial information, analyze debt conditions, and recommend suitable settlement and repayment strategies.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Processor	Intel Core i5 or higher
Memory	RAM	8 GB Minimum
Storage	Disk space for database, application and logs	1 TB SSD (Recommended)
Software		
Frameworks	Backend & Frontend	FastAPI, Streamlit
Libraries	Python Libraries	SQLAlchemy, Uvicorn, Pandas, NumPy
Development Environment	IDE	Visual Studio Code, PyCharm
Data		
Data	Source, Format	User Financial Data, Loan Records, SQLite Database, CSV/JSON Files
